c't Desinfec't 20/21

The security tool from the c't editorial team has been in use for over 15 years and helps Windows users out of trouble with virus attacks. To prevent Windows from being damaged even further, Desinfec't starts as a stand-alone operating system from a DVD or USB stick and checks potentially contaminated systems from a safe distance. It scans hard drives with anti-virus scanners from Eset, F-Secure, Kaspersky and Sophos.

Under certain conditions, professional tools can even be used to rescue data that was thought to be lost, such as final theses or clone entire hard drives.
