

iX extra STORAGE

The topic special in iX 06/21

Storage trends and technologies

Storage is currently changing rapidly: diskless storage is coming in ever new forms, hard disks are nonetheless becoming faster and denser, and even tape in IT will probably be retained in time-adjusted forms as an unbeatably cost-effective long-term storage medium for a long time to come. The integration of computing and storage systems is developing in two directions: on the one hand, storage and computing can be disaggregated thanks to the fastest interconnection technologies such as NVMeoF, without negative latency effects becoming noticeable. On the other hand, a new class of storage components integrates computing power directly into the system. Higher functions are increasingly being implemented hardware-independently either as a cloud service or as software-defined storage, although the future has only just begun here. Last but not least, containers and Kubernetes environments mean that storage and storage services are currently having to reinvent themselves once again.

DATES

Space close	10 May, 2021
Materials:	12 May, 2021
On sale:	27 May, 2021

Editorial contact: Susanne Franke – Phone: +49(0)89/ 28807480 – E-mail: pr-franke@web.de

NO SURCHARGE – BUT ADDITIONAL BENEFIT!

Parallel to print the „iX-extra“ content is available as free PDF download. On www.ix.de (follow Rubrik: **Artikel/iX extra**) its accessible for all iX users and guarantees additional contact among our users without additional charge.

RATES & FORMATS 4c

2/1 page	1/1 page	1/2 page	1/3 page	1/4 page
				
a) Type area: 390 × 260 b) Bleed: 420 × 297*	185 × 260 210 × 297*	185 × 128 210 × 149*	185 × 84 210 × 107*	185 × 62 210 × 80*
€ 11,850	€ 5,990	€ 3,415	€ 2,560	€ 2,060

Magazine format: 210 mm x 297 mm *) Trim allowance for bleeds: 3 mm bleed overall. BW ads and other formats on request!
