

PROTECTING DATA

The loss of operational and customer data poses a significant risk to businesses and other institutions. There are many critical points: Be it the e-mail that can become a gateway for attacks, the incorrectly used virus scanner service or important data that is not stored and stored securely enough. The special issue „c't Protecting data 2023“ (c't Data Protection 2023) provides practical help on these and other questions on how to better secure IT.

With the special issue, IT managers also receive free access to the heise Academy video course „Information Security and Data Protection in the Enterprise,“ which guides them through all phases of planning and practical implementation of information security in their company.

Use e-mail securely

- Danger-free handling of e-mails
- Recognizing and warding off phishing e-mails
- Sending trustworthy e-mails
- Defuse suspicious mail attachments

Practical data protection in everyday life

- Encrypt MS Office files
- Data protection compliant customer management
- Using virus scanning services correctly
- Data leakage through Azure workflow
- Boundaries for video surveillance

Store and store safely

- Encryption tips
- Security check of self-encrypting USB storage devices
- Alternative software encryption
- Secure storage of valuable data
