Conference	Topic / Date
	<p>secIT by heise Fair + conference March 06 - 07, 2024 – Hanover Congress Centrum</p> <p>secIT by heise - THE meeting place for security users and providers! In 2024, the IT security industry will meet for the fifth time in the trade fair city of Hanover to discuss current projects, innovative technologies, trends and the latest developments in the field of IT security. secIT by heise has grown over the years and will take place in 3 halls and on an area of more than 5,000 m². We have upgraded the content as well: 3 themed stages, up to 20 workshops and more than 40 deep dive sessions offer plenty of opportunities to convey and discuss exciting content. We are also expanding the start-up area. This gives our exhibitors multiple opportunities to get noticed and position themselves in terms of content. If you would like to find out more about vacant stand areas and presentation opportunities, please contact us. If the digital secIT by heise is also of interest, we grant a combined discount.</p> <p>Target group: IT security managers, Managing directors, CSOs, COOs, Data center managers, IT department managers, IT administrators, Data protection officers</p> <p>Participants: 2,000+</p> <p>www.secit-heise.de</p>
	<p>heise devSec at secIT by heise NEW Presence event March 06 - 07, 2024 – Hanover Congress Centrum</p> <p>The conference for secure software and web development: At heise devSec, you will meet security experts as well as developers and architects focussing on the topic of security. The spring conference will focus on supply chain risk management and AI security in software development in order to present participants with practical solutions.</p> <p>Target group: Software developers, Software architects, Security officers, Quality officers, Security experts, Penetration testers, Tester, Product manager</p> <p>www.heise-devsec.de</p>
	<p>secIT by heise DIGITAL Digital fair + conference September 11 - 12, 2024</p> <p>At secIT by heise Digital, the latest trends, solutions and information on IT security will be presented. As with the face-to-face event in March, secIT by heise Digital will also have a strong topic-related and editorial character.</p> <p>We have already learned in recent years that digital formats are a popular alternative for many visitors, and that is why we want to offer our participants the opportunity to obtain information and follow exciting presentations between the pressure of deadlines and everyday life. We offer exhibitors the opportunity of 20 presentation slots. This enables us to ensure the highest possible visibility, access to all event participants and plenty of potential for lead generation in the 2nd half of the year.</p> <p>If you are interested in participating, request the detailed sales kit.</p> <p>Target group: IT security managers, Managing directors, CSOs, COOs, Data center managers, IT department managers, IT administrators, Data protection officers</p> <p>Participants: approx. 1,000</p> <p>www.secit-heise.de/digital-2024/</p>

	IT Security Days Presence events June 26, 2024 – Mainz, University Mainz September 05, 2024 – Dortmund, University of Applied Sciences Dortmund November 06, 2024 – Gelsenkirchen, Westfälische University <p>The IT Security Days address the latest issues in IT security. The event is aimed at system administrators, IT security managers and technical experts from companies in all industries. Each IT Security Day has its own main topic and thus also an individual program. What both conferences have in common is the structure of the program as well as the content support of an educational institute. Both conferences are supplemented by the participation of sponsors. Partners who would like to be present on several dates will of course benefit from a combined discount.</p> <p>Target group: Security and Data protection officers, Federal BSI baseline protection offices, Technical experts in the company, System administrators, Network administrators and Network planners</p> <p>Participants: approx. 100 per conference day</p> <p>www.heise-events.de/conferences</p>
	 heise devSec Presence event September 25 - 26, 2024 – KOMED, Cologne <p>The conference for secure software and web development: At heise devSec in Cologne, you will meet security experts as well as developers and architects who focus on the topic of security. The conference explores the following crucial questions: How can applications be protected against yet unknown vulnerabilities of tomorrow? How do teams integrate security into agile processes and continuous integration? How can distributed systems be consistently secured? What measures help secure systems that use machine learning?</p> <p>Target group: Software developers, Software architects, Security officers, Quality officers, Security experts, Penetration testers, Tester, Product manager</p> <p>Participants: 200+ per conference day</p> <p>www.heise-devsec.de</p>
