

DESINFEC'T 2024/25

The security tool from the c't editorial team has been in use for over 15 years and helps Windows users out of trouble in the event of a malware attack. To prevent further damage to Windows, Desinfec't runs as a stand-alone operating system from a DVD or USB stick and checks potentially infected systems from a safe distance. It scans hard drives with anti-virus scanners. Under certain conditions, professional tools can even be used to recover data that was thought to be lost, such as final papers, or to clone entire hard drives.
