

DESINFEC'T 2025/26

Desinfec't 2025/26 scans Windows for viruses.

It comes with virus scanners from Eset and Ikarus, among others. Free signature updates are included for one year to ensure that the scanners also detect the latest threats. If a scanner sounds an alarm, you can assess the findings in order to recognize possible false alarms. If it really is a virus, Desinfec't neutralizes it.

To ensure that this happens in as safe an environment as possible, Desinfec't comes with its own Linux-based live system and starts directly from a USB stick instead of Windows. Because a virus in this state is also inactive like Windows, it cannot cause any more mischief. This allows you to examine the system from a safe distance.

The c't security tool is aimed at computer beginners and also has several analysis tools on board for malware professionals.

In addition, readers can use TeamViewer to get help from the family admin on a possibly infected computer if they don't know what to do.

Topics

- The functions and possibilities of Desinfec't presented
- Step-by-step guide: How to install and start Desinfec't
